Learning 😃

“Years of experience alone do not make you great…

If you never learned from those years, time passed — but growth never happened.”

Many people say,

“I have 10 years of experience.”

But the real question is —

“What did you learn in those 10 years?”

Repeating the same mistakes again and again is not experience.

Learning from every mistake and improving yourself — that is growth.

Every situation in life comes to teach us something.

Loss teaches caution,

Failure teaches patience,

And success teaches responsibility.

Without learning, experience becomes only memories…

But with learning, experience becomes wisdom.

Every day gives you two things —

An experience or a lesson.

Wise people turn both into growth.

So, Always remember —

“Experience may make you older…

But learning makes you more valuable.”
